Making Medication Affordable

AFFORDABLE Rx MEDICATION

Prescription Hope provides access to over 1,500 brand-name medications for only \$70 a month per medication through Prescription Hope's nationally recognized medication access service. \$70 covers 100% of the cost for each medication no matter the retail price.

Our advocates handle everything including managing enrollment, tracking deliveries, and coordinating refills through patient assistance programs for those who qualify.

Nationwide Coverage

- Prescription Hope helps insured, under-insured, and qualifying individuals access the medications they need at an affordable cost.
- No two cases are the same. We treat every situation individually, carefully reviewing household income, medication, and manufacturer guidelines. Then we go over all available options to help access the medication needed.
- We provide a simple, consistent medication access solution—with one straightforward monthly service fee and no copays, tiers, or deductibles.
- Enrollment is always available — individuals can sign up any time, 24/7/365, with no limited enrollment windows.
- We help people access real savings through manufacturer assistance programs, offering an alternative to short-term discounts or coupons.
- Prescription Hope is accessible to individuals of all ages, with no age restrictions to enroll.

Xeljanz XR

After we receive all necessary documents from your patient and their healthcare provider, we manage their enrollment. Once approved, we maintain the refill schedule. After approval, the first order is typically delivered within 2 weeks directly from the manufacturer.

OUR PROCESS FROM START TO FINISH

1

You or your client will complete and submit an online enrollment form.

2

We pre-qualify you or your client once we determine we can assist based on the information submitted on the online enrollment form.

3

We request documentation from the applicant and their healthcare provider. This information is required by the pharmaceutical manufacturer to complete each medication order.

4

Medications are typically delivered in a 90-day supply, directly to you or your client's home or healthcare provider's office as required by the pharmaceutical company that ships the medication.
